**Custom-Fabricated Strainers and Valves, including IFC's Self-Cleaning Strainer**

# \*CRN included.

"The fitting manufacturer shall register, separately, each category of fitting manufactured with the regulatory authority in the province of manufacture or, for installation-specific specialized fitting design, with the regulatory authority in the, province of installation."

*excerpt from CSA B51*

Islip Flow Controls is a Canadian manufacturer of strainers, valves and pipeline accessories. Being in Canada means we understand fully the requirements of CSA B51 and the individual provincial regulatory requirements in order to supply products with Canadian Registration Numbers (CRNs).

Unlike other manufacturers based outside of Canada if we don't have a CRN for one our products in your province of installation we are able to obtain the CRN in a matter of weeks, not months.

With a database of over 300 CRNs in all provinces across Canada we have the expertise to supply product that meets with your Local Regulatory Authority requirements.

*Consult factory for CRN numbers applicable to individual product lines and provinces of installation.*
